

**Danielle Turley Bio**

Danielle Turley is a scientific reviewer in FDA's Office of *In Vitro* Diagnostics and Radiological Health (OIR) in the Division of Immunology and Hematology Devices. She is responsible for providing scientific review for pre-submissions, 510(k)s and PMAs submitted to the Immunology and Flow Cytometry Branch. Danielle received her B.S. in Biology from James Madison University and Ph.D. in Immunology from Northwestern University. After receiving her doctoral degree, Danielle continued biomedical research at Northwestern University's Feinberg School of Medicine. In 2008, Danielle joined the FDA as part of the inaugural class of the FDA's Commissioner's Fellowship Program where she was a Chemistry, Manufacturing and Controls reviewer for the Office of Cellular, Tissue and Gene Therapies in the Center for Biologics Evaluation and Research. Upon completion of the fellowship program, Danielle joined OIR in 2010.
