

Girish Putcha Bio

Girish Putcha is currently Director of Laboratory Science for Palmetto GBA, and the founding Medical Director for Orion Genomics and TOMA Biosciences.

Previously, Girish was the founding laboratory director at Ariosa Diagnostics, Crescendo Bioscience, and Life Technologies, and worked in venture capital at Panorama Capital and RiverVest Venture Partners, focusing on investments in the life sciences. Prior to this, he held various positions at Aviir, CardioDx and VeraCyte, all venture-funded personalized medicine companies.

Girish received a bachelor's degree from Rice University and two master's degrees from the University of London and the Wellcome Institute as a Marshall Scholar. He holds medical and doctoral degrees from Washington University School of Medicine, where he also completed a postdoctoral fellowship in molecular neuroscience. Girish completed his postgraduate medical training at the Stanford University School of Medicine, where he also served as adjunct faculty, specializing in molecular genetic pathology.
